Employee wellbeing

At Grosvenor we understand that there are many factors outside our control that can have a negative impact on how we feel and behave daily. However, we also recognise that there is a lot of choices we can make to enhance our employee's wellbeing, whether that be physical or emotional.

We've taken time to create what we believe to be an all-encompassing wellbeing programme which pulls on all the feedback we received from the business on what's important to them.

The programme encompasses several wellbeing themes but this year, we've included a few added perks and incentives – this is because we've identified that some of our everyday stresses could be alleviated with a few added extras.

Grosvenor is on a mission to accelerate growth – and as part of our goal for growth, we've placed significant effort into looking at our approach to attraction and retention of employees. It's common knowledge that to win in the marketplace you must first win in the workplace.

So, we're building on what we've been doing for years and making it a more honed, impressive and award winning (we hope!) employee engagement programme – we believe our focus on increasing engagement and enhancing our company culture is paramount to achieving growth and success for the business.

We've broken down the programme into two main areas:

Wellbeing

Wellbeing - Soft benefits that allow you to enhance your physical, emotional and financial health.

Perks and incentives

Perks and incentives - Tangible benefits that enhance your total reward package.

We believe that we have created a great programme that benefits each and every one of our team.

Investors in People (IIP)

IIP is an internationally recognised standard that defines what it takes to lead, support and manage people well for sustainable results. It is the UK's leading accreditation for business improvement through people management and provides resources for businesses to innovate, improve and grow.

Grosvenor is currently going through the accreditation process and will be accredited (all going well!) by January 2021.
